### **Manufacturer's Declaration of the product life: Vector series for outdoor application**

We,

Hager Electro GmbH & Co. KG, Im Hofgarten, 66131 Saarbrücken,

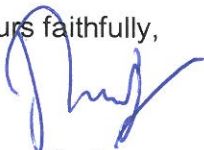

declare under our sole responsibility

that the plastic materials used for the manufacture of enclosures for the ranges VExxxSN and VExxxPN of the Vector series correspond, according to available suppliers' declarations, to the classification f1 and are suitable for outdoor use with respect to exposure to Ultraviolet Light, Water Exposure and Immersion in accordance with UL746C .

After years of use, a slight discolouration of the enclosure material may occur. This effect can be avoided by shielding the enclosures from direct sunlight.

The proper installation in accordance with all technical product specifications provided, and accounting for the allowable operating temperatures and the chemical resistance of the materials used, the anticipated product life will be at least 10 years.

Yours faithfully,

Rémy Becher  
Vice President
