Manufacturer's Declaration of Dielectric Strength of Vector enclosures

We,

Hager Electro GmbH & Co. KG, Im Hofgarten, 66131 Saarbrücken,

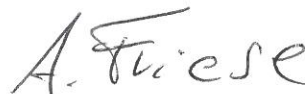

declare under our sole responsibility

that the enclosures of the Vector series, range VExxx, have been tested for dielectric strength to a test voltage of 2,5 kV according to EN 60 439 part 1 and 3, section 8.2.2, and can therefore be equipped with the proper equipment when the required clearance and creepage distances are maintained.

Yours faithfully,

Bernhard Gros
Product Manager Residential Enclosures
Business Area Enclosures

Andreas Friese
